

THEORETICAL PCR SEMINAR

On March 11, Ampliqon will present at the Center for Translational Research. During the seminar Ampliqon will be focusing on the general PCR method and common PCR applications. In addition, Ampliqon will present useful tips and tricks in optimizing the PCR protocol to achieve the best possible results.

AGENDA

- Introduction to PCR
- Different types of PCR enzymes and their functions
- Optimization of PCR
- Different PCR applications:
 - End-Point PCR
 - Quantitative PCR

PRACTICAL INFORMATION

The seminar will be held at:

Center for Translational Forskning
Nielsine Nielsens Vej 4B
Entrance 80, 3. floor
Bispebjerg Hospital.

Date: 11-03-2020
Time: 14:00 - 16:00

ABOUT AMPLIQON

Ampliqon has facilities in Odense, housing all activities such as production and innovation of high-end PCR enzymes, quality control and sales and marketing.

The Ampliqon PCR enzyme collection covers all needs for standard DNA amplification. Our specialised knowledge of both enzyme purification and DNA amplification provides our customers with reliable and high quality products.

Ampliqon is recognized by fast deliveries, high quality and competent support.

Do you want value for money, good pricing, high quality and fast delivery?
Buy PCR enzymes from your Danish manufacturer and supplier Ampliqon A/S
